R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```

Echo : Cette option contrôle si le script R (le code) est visible ou non dans la sortie générée.

results : l'option results contrôle comment les résultats du code R sont affichés dans le document final. Elle peut être utilisée pour afficher les résultats normalement, les cacher, ou les afficher sous une forme brute ("markup", "hide", "asis").

warning :

```
log(-1)
```

```
## Warning in log(-1): Production de NaN
```

```
## [1] NaN
```

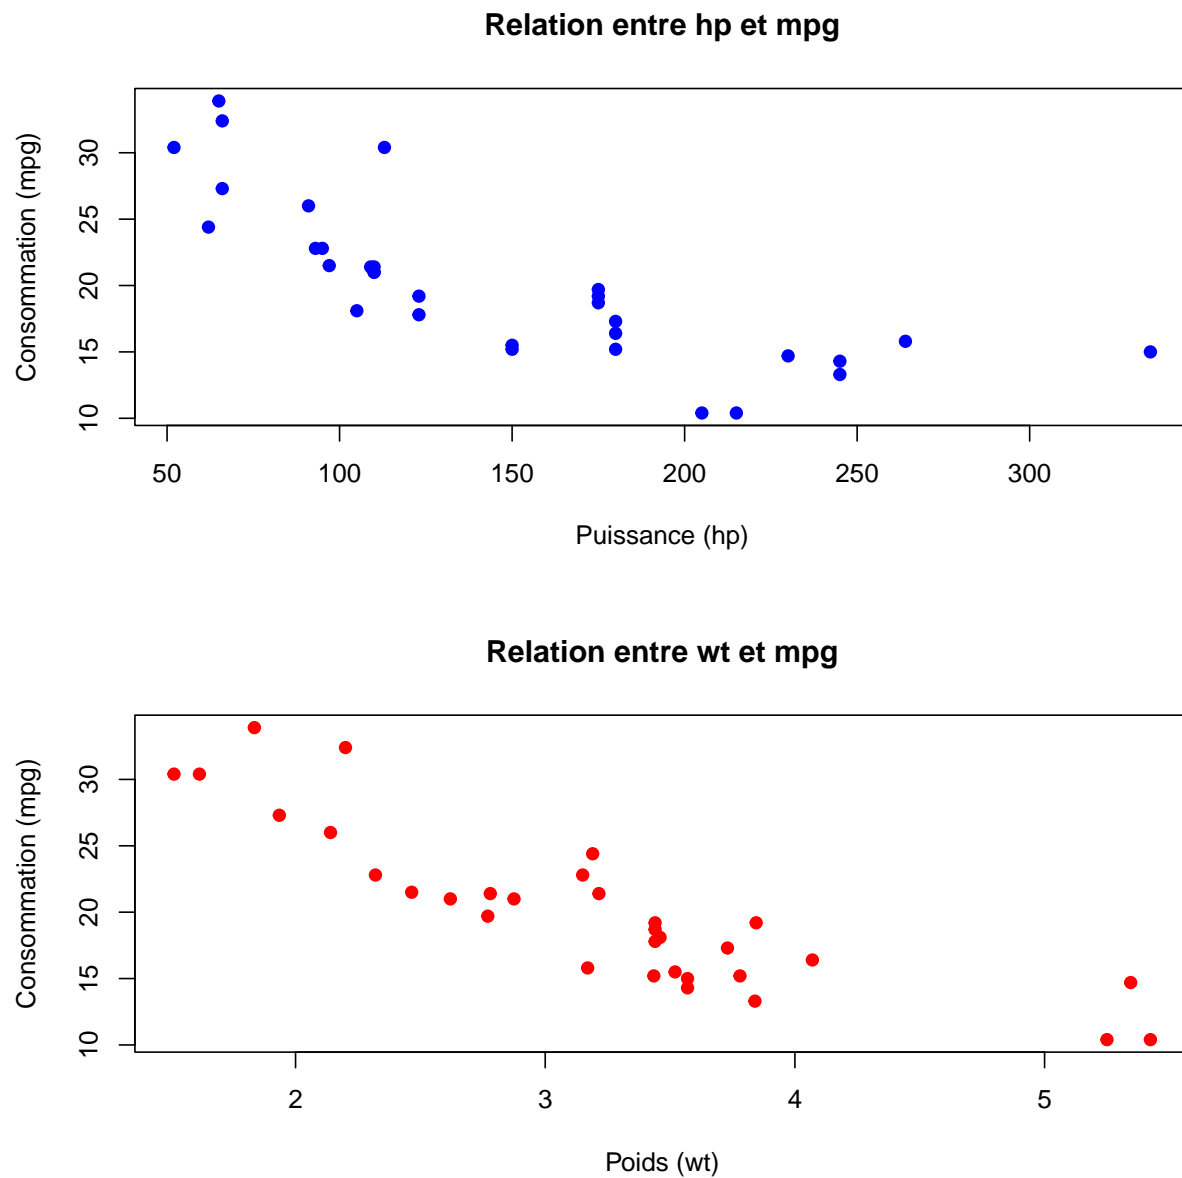

Ne pas afficher le warning

```
log(-1)
```

```
## [1] NaN
```

Including Plots

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
